

INDUSTRIAL RACK NETTING

ENGINEERED SAFETY SOLUTIONS

Fall-related and struck-by-an-object workplace accidents are the 2nd and 3rd leading causes of job injuries and fatalities. Every day workers are at risk without the adequate equipment, training, and prevention systems in place.

RACKGUARD SAFETY NETTING

Factory Supply offers a complete line of Industrial Rack Netting as a cost-effective, engineered solution designed to make warehouses safer for employees and visitors.

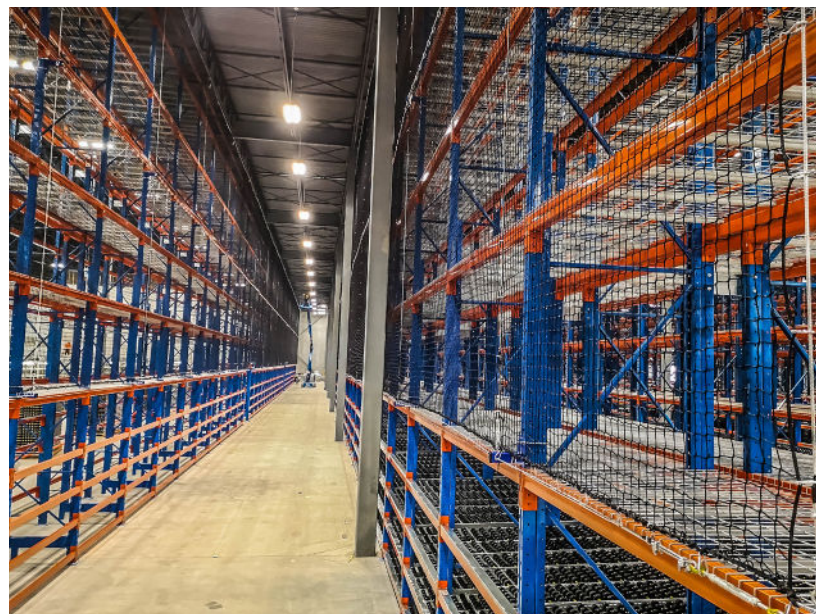

Our Industrial Rack Netting system has been designed and tested specifically for industrial racking applications. Each custom design utilizes engineered offset and extension brackets, load-rated cable systems, to adapt to any racking configuration.

MEETS AND EXCEEDS ALL MAJOR AMERICAN SAFETY STANDARDS

ANSI

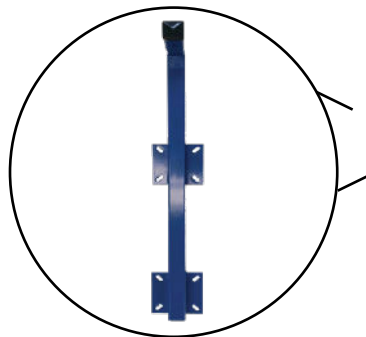

OSHA

NFPA

INDUSTRIAL RACK NETTING SYSTEM

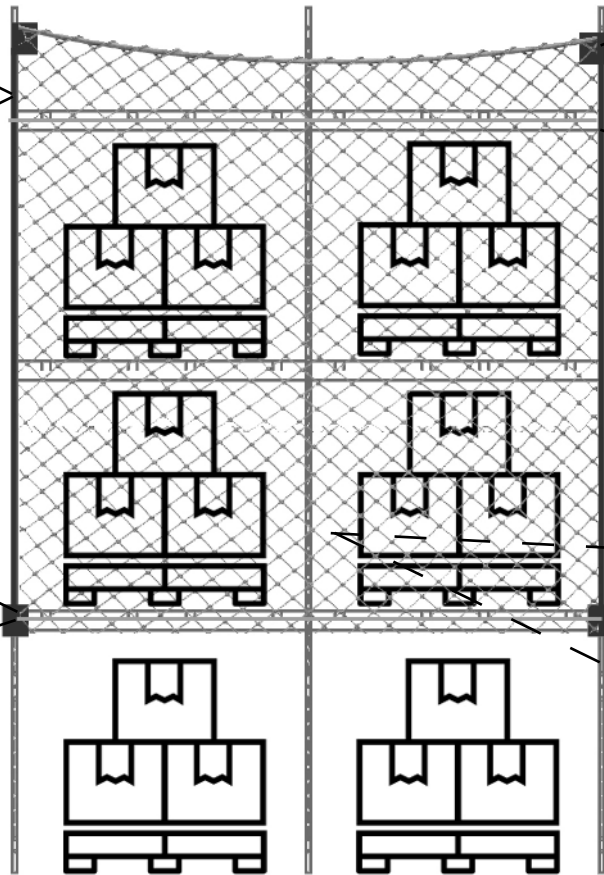

An "engineered" system consisting of custom-fitted netting panels, rigging hardware and brackets.

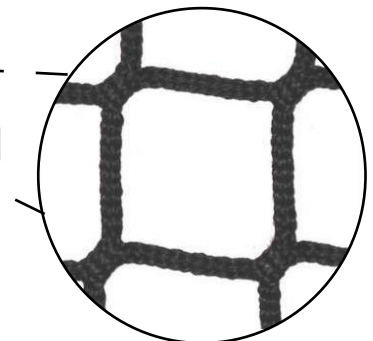

Frame Extensions: range from 1' up to 4'
HD Extensions: available for 5' or 6' applications
