

# SPECIFICATION SHEET

## BALLASTED WALKWAY ROOFWALK SERIES

The RoofWalk system is designed to create a sure-footed walkway on your rooftop. This fully customizable platform utilizes non-slip materials and is installed above the roof membrane ensuring no damage is being done while in used. Utilizing our counterweighted baseplates and guardrails, this system can be tailored to any flat roof or low slope application, providing safer access to any workspace by eliminating slipping and fall hazards. Engineered for safety and built economically, the RoofWalk system is a must on any rooftop where constant roof access is required.

### FEATURES

**Modular Design:** Easily assembled and reconfigured for various rooftop layouts.

**Non-Penetrating:** No drilling, welding, or bolting required.

**Counter-Weighted:** Baseplates provide stability without damaging the roof.

**Compliance:** Meets or exceeds OSHA, ANSI, and state-specific safety standards.

**Durable Materials:** High-strength aluminum construction

# BALLASTED WALKWAY | ROOFWALK SERIES

Freestanding counterweighted rooftop guardrail system.

## SPECIFICATIONS

Material	Galvanized steel and aluminum components
Walkway Surface	Slip-resistant grated platform
Baseplates	Cast steel nesting design with counterweights
Slope Adaptability	Adjustable for 0-4" roof pitches
Roof Types	Membrane, gravel, concrete
Guardrail Height	42" from grating to top of rail
Installation	Non-penetrating, modular design
Load Capacity	Meets OSHA requirements for walking-working surfaces
Options	Steps and traverse options available
Compliance	OSHA 1910.28, OSHA 29 CFR 1910.22, ANSI Z359 standards
Warranty	5 years

## COMPONENTS

## APPLICATIONS

» Grated slip-resistant walkways	» HVAC equipment access
» Counterweighted baseplates	» Roof maintenance pathways
» Rubber protection mats	» Solar panel maintenance routes
» Vertical posts and horizontal rails	» Rooftop mechanical areas
» Complete installation manual	» Regular inspection paths
» Layout drawings	
» Set screws and hardware
